

下の計算問題の□に数字を記入して、それぞれ違う式を完成させてください

「1」を使うのは禁止です 割り算①

$$\textcircled{1} \square \div \square = 2 \quad \textcircled{9} \square \div \square = 4 \quad \textcircled{17} \square \div \square = 6$$

$$\textcircled{2} \square \div \square = 2 \quad \textcircled{10} \square \div \square = 4 \quad \textcircled{18} \square \div \square = 6$$

$$\textcircled{3} \square \div \square = 2 \quad \textcircled{11} \square \div \square = 4 \quad \textcircled{19} \square \div \square = 6$$

$$\textcircled{4} \square \div \square = 2 \quad \textcircled{12} \square \div \square = 4 \quad \textcircled{20} \square \div \square = 6$$

$$\textcircled{5} \square \div \square = 3 \quad \textcircled{13} \square \div \square = 5 \quad \textcircled{21} \square \div \square = 7$$

$$\textcircled{6} \square \div \square = 3 \quad \textcircled{14} \square \div \square = 5 \quad \textcircled{22} \square \div \square = 7$$

$$\textcircled{7} \square \div \square = 3 \quad \textcircled{15} \square \div \square = 5 \quad \textcircled{23} \square \div \square = 7$$

$$\textcircled{8} \square \div \square = 3 \quad \textcircled{16} \square \div \square = 5 \quad \textcircled{24} \square \div \square = 7$$
